## **RIDEAU VIEW GOLF CLUB ALLERGEN PROTOCOL 2016**

### ***General***

The Rideau View Golf Club Allergen Binder has been prepared in accordance with the Canadian Food Inspection Agency Guidelines for Allergens and its Protocols.

**The Allergen Binder is Orange and can be found beside the Kitchen Recipe Binder.**

Members and guests must be responsible for reporting their allergens and sensitivities each and every time they place a food order at Rideau View Golf Club.

It is recommended that those with food allergies carry an Epi-Pen, if not more than one (a single shot lasts but 12 minutes.)

Those with sensitivities should keep Benadryl on hand.

Members should advise other members with whom they spend time with at the club, whether they are carrying an Epi Pen or not.

With the report of Anaphylaxis Medical Emergency, 911 must be dialed immediately. Often times a person going into Anaphylaxis Shock will not want to make a fuss and will try and leave the room. Members and staff should not let this happen. Shock of this magnitude is catastrophic and there can be serious consequences in a matter of minutes.
